

This model of Family Ministry incorporates the following areas of focus:

Building the Home: We believe that the home is the primary place where faith is shaped and nurtured in each generation. We want to offer the support and resources needed for families to experience effective spiritual growth within their own households.

Faith Journey: Every local church has a vital role as a caring community in which opportunities can occur for nurturing the faith in individual family members and generating processes for supporting a growing faith in the home setting.

Discipleship: Each member of the Christian family has a unique walk of faith with our Lord Jesus. The overlap of a home centered—church supported faith nurturing process centers on Christ and contributes to a deepening trust in God for individuals of all ages.
